

## **Job Description – GeoLog, LLC**

- Job Title:** Logging Engineer/Technician/Geologist/Geophysicist
- Location:** Central Location - downtown Phoenix, Arizona. Projects located throughout Arizona and surrounding states.
- Terms:** Full Time – Typically 10 days on/4 days off. Benefits include healthcare subsidies, vacation time off, and retirement plan after 6 months. Profit sharing and bonuses available.
- Salary:** Competitive. Increases with experience.
- Requirements:** Vehicle Travel (mostly in state, but some out of state). Some out-of-town stays may occur. Must have valid/clean Driver's License. Jobs may include weekends, nights, out-of-town, and holidays. Ability to lift 50 pounds, work independently, work outdoors (all seasons). Good communication skills extremely important.
- About GeoLog:** We are a small, growing geophysics company that works primarily for drilling companies. We deploy electronic instruments down drilled holes to measure properties of the subsurface for various applications. Our main function is to identify the geology that has been penetrated by the driller. GeoLog's priority is customer service and quality data.
- Job Description:** Outdoor fieldwork – Travel in work vehicle. Running electronic instruments in open borings to collect geologic data. Some moderate lifting. Computer knowledge is helpful. Data analysis and reporting will be trained and will lead to advancement. Shop work – equipment maintenance and repairs, running and shipping tools, computer work, including reports. Various shop duties include cleaning and maintenance.

### **Experience and Education that would be considered beneficial:**

- Knowledge within the field of geology, engineering, electronics, or mechanics;
- Knowledge of geophysics;
- Knowledge of well drilling;
- High school diploma or equivalent with proven work experience in a related field;
- Degree in geology, engineering, electronics, or mechanics is beneficial.
